# About Us

Metropolitan has over 25 years' experience in all aspects of the security industry. Over the past 10 years, manned security services have reduced due to the economic climate, changes in legislation and improvements in the electronic security in which we specialise.

There are many companies in the UK now providing security services. Where we have the edge is through focusing on providing the best possible equipment and service at very competitive rates. We do this by reducing our overheads and concentrating our finances on professional installation of leading security equipment. This has paid dividends, and we are incredibly proud to say our valued client base has been built almost completely by recommendation.

# Temporary CCTV

- > Prevent theft and vandalism
- > Modern CCTV technology
- > Remote security system

CCTV systems can range from one static camera viewed on a screen to a full PTZ (Pan, Tilt and Zoom) digitally recorded CCTV security system, with 24/7 manned CCTV monitoring station that receive up to the minute detections and information picked up by sensors, enabling swifter reaction times.

Our experience with commercial CCTV solutions make Met Security the leading choice for CCTV installation in our area. We provide professional installation of indoor and outdoor security cameras.

# Temporary Fire Alarm Systems

- > Modern, effective and efficient
- > Wireless alarm systems
- > Prevent a disaster

The safety of personnel and public on your temporary site is essential. But as your site is only live for a short time, temporary measures need to be put in place that are easily installed and removed. We provide a temporary solution that is both cost-effective and safety efficient for your business or site.

We install high quality systems that are effective at detecting fires and sounding an alarm to bring about the necessary action that could make the difference in preventing a potential disaster.

# Construction Site Security

- > Modern, effective and efficient
- > Protect your site
- > Prevent a disaster

We provide options to hire or purchase CCTV systems, providing full installation for all of our products - whether you're looking for a single camera solution or a full network of CCTV cameras. The presence of security cameras serves as a deterrent, putting off thieves and vandals, giving you peace of mind when leaving your construction site.

CCTV cameras also make your construction site a safer environment for your staff and any visitors to the site, providing a sense of security and giving your staff and visitors peace of mind.
